

DRAPERY CYCS AND SCRIMS

Muslin Cycles

Leno-Filled Scrim

Scrim

Muslin & Opera Cyc

InProduction Production Services muslin or opera cycles may be used for rear or front projection of gobos, videos, slide images and more.

Sharktooth Scrim

InProduction Sharktooth Scrim is commonly used for effect. When Sharktooth Scrim is lit from the front at an oblique angle, the scrim remains opaque, hiding the scene behind it from the audience. Dimming the front, and lighting behind the scrim renders the scrim invisible so the audience can see the scene behind the scrim.

InProduction can help make an effective use of a scrim, adding beauty and interest to any stage backdrop.
